SIMONE CRESTANI GLASS BEE BOTTLE

Simone Crestani works in borosilicate glass with a special technique of flame working that he calls Hollow Sculpture. This technique allows him to create large-scale objects in glass with decorative details. The glass overcomes its material dimension and becomes a fine and studied artistic language.

handblown borosilicate glass

H10.5"

due to its handblown nature, each is unique and may vary slightly in size

made in Italy

\$350.00
